SAFETY GOGGLES

HSG06

GENERAL SAFETY WARNINGS

⚠ WARNING! This eye- protection is not designed to provide unlimited protection to the eyes. Please read these instructions carefully before using for the safety's sake.

Criterion

Our safety spectacles satisfy the requirements of European Directive 2001/95/EC and the harmonized standard EN ISO 16321-1:2022, and comply with the requirements of (EU) Regulation 2016/425. EU-type examination certificates have been issued by: DIN CERTCO

Warning which are caused at the risk analysis

Failure to comply with the indicated mechanical strength (insufficient protection), always check that your given the proper protection, in uncertainty check with the health and safety representative.

- a) Exceeding the service life (insufficient protection), check the eye-protector before each use, for damage and life-time.
- b) Using an eye-protector without filtering action against optical radiation (damage to the eyes), check before each use, that the eye-protector has the necessary scale number, in case of uncertainty check with the health and safety representative, otherwise the protection cannot be guaranteed.
- c) Using the product against splashes (insufficient protection), always check that your given the proper protection, in uncertainty check with the health and safety representative.
- d) Using the product against large dust particles (injury, accident). The eye protection device must only be used for the work described in the instructions for use. Any deviation from the instructions may cause injury or accidents.
- e) Use of damaged products (insufficient protection), check the eye-protector before each use, for damage and life-time.
- f) Improper use of the eye-protector (injury, accident). The eye protection device must only be used for the work described in the instructions for use. Any deviation from the instructions may cause injury or accidents.
- g) Protectors that have been subject to impact shall not be used and shall be discarded and replaced.

- h) If the impact level symbols are not equal on both the lens/filter and the frame, then it is the lower level that shall be assigned to the complete protector.

The user shall contact the health and safety representative to ensure he is given the proper protection by the personal eyewear during working conditions.

INTENDED USE

The eye-protection can protect the eyes from the danger of mechanical collision caused by high-speed particles.

Please inspect the spectacles frequently. If the structure of the lenses is damaged or the surface is scratched, replace the product immediately, the duration depends on factors such as use, cleaning, storage and maintenance.

OPERATION

These safety goggles help block small flying objects or particles, while providing essential protection from harmful UV rays. Help reduce sunlight and are popular for outdoor use.

A warning that eye-protectors against high-speed particles worn over standard ophthalmic spectacles may transmit impacts, thus creating a hazard to the wearer. We recommend a use of the spectacle for a period of 1 year. The duration of use depends on various factors such as use, cleaning storage and maintenance. Frequently inspections and replacement if it is damaged are recommended.

Declaration of the materials

The material of the eye-protection, which is directly in contact with skin, will not do any harm to the skin. But to those who are easily allergic, there might be allergic reactions

Material: PC (polycarbonate)

Dark shade: 8

DIN4

Lens color: black

MAINTENANCE AND CLEANING

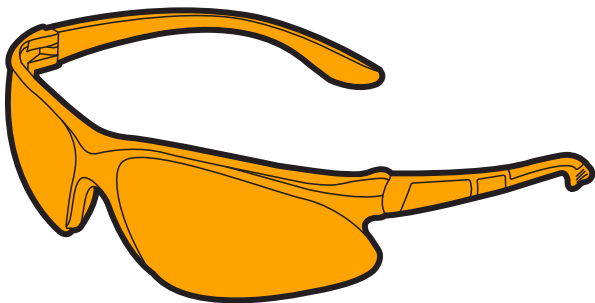

Maintenance

When you don't use the eye-protection, we suggest you put it into a clean bag or a clean and dry glasses box.

Cleaning and disinfection

A better way to maintain the eye-protection

- a) Don't use abrasive materials. Using warm suds and soft cloth to wash and clean.
- b) Use alcohol to disinfect the eye-protection parts which are directly in contact with the skin
